

Advantages of the 4th International Medical Olympiad

Thessaloniki, 3-5 November 2017, Hotel Electra Palace

The advantages of the 4th International Medical Olympiad as compared to hundreds of medical meetings taking place worldwide every year are unique and noted below:

- a) His all Holiness the Patriarch of Constantinople, the Ministry of Health and the Medical of School are supporting this event.
- b) The fact that only original papers of social interest are orally presented makes this event equivalent to a number of other congresses where original papers are very few or absent. It is a multi-congressional event.
- c) This event lasts only 2 days (Friday and Saturday) so that the participants will not be absent from their duties for more than one working day. Participants will have time on Sunday after the meeting to enjoy themselves in a daily excursion and communicate with each other.
- d) Colleagues from different countries interested on different subjects will exchange views and be informed of the research of other colleagues so that will better evaluate their own research and enrich their medical knowledge.
- e) Evidence based observations resulting in useful diagnostic and therapeutic procedures in what we call Neohippocratic Medicine, as published in the 2nd Edition of a booklet will be distributed in a limited number, to the participants.
- f) A new contest will take place. Colleagues who may not participate in person may send by surface mail or e-mail their replies to 3 research questions which can be found in the Information Booklet of the meeting.
- g) Three distinguished colleagues who offered much to Medicine will be honored: Professors Abass Alavi, Anastasios Tousimis and George Sfakianakis

For more information, registration and for receiving the Information Booklet, please apply to molympicus@gmail.com or tel.: +30 2310 229 133 and/or visit our site www.medolympicus.gr. Financial support may be asked through the above email address.
