Dear Colleague

With the personal greetings from the Administrative Board and the Organizing Committee of the International Medical Olympicus Association, and concerning the decisions-Rules decided by the Advisors Committee Meeting during the previous Olympiad, we would like to inform you of the following:

a) We plan to have the 5th International Medical Olympiad again in Electra Palace Hotel on 3-6 October 2019. In the 5th Olympiad we hope to have increased financial flexibility in order to cover travel expenses or hotel booking. Of course, Advisors shall have priority.

b) We shall be able to publish in a supplementary issue, papers accepted for oral presentation and also for the first time important papers submitted but not presented orally for technical reasons.

c) You may kindly wish to refer to your Medical Society and also to other Medical Societies in your country whether they wish to be cooperative Societies with us. This will allow them to have priority in all organizing levels and facilitations of the Olympiad.

d) As stressed by the Rules of the Advisors Committee Meeting, young colleagues and their papers will be welcome. They kindly asked to suggest to us through the Advisors of their country for special facilitations.

e) Finally, according to the 7th Rule of the 1st Advisors Committee Meeting, you may wish to ask a Medical Society in your country, or an Institute, or a Hospital or a person, to act as a Sponsor for a competition under “his name” and call for submission of original or research under a subject that The Sponsor will choose. The whole procedure will be duly advertised through our site, our correspondence and our programme. The Sponsor or his representative will award the prize to the winner of this contest. We suggest that the prize to the winner will be at least 1.000€ and the Sponsor will additionally offer at least half of this sum for the secretariat of the Organizing Committee.

We will be glad to have your suggestions and advice for better organizing the above and also for other related events in the future.

I must say that the Neohippocratic Medicine booklet in its 4th Edition is being duly revised and much enriched and will be published and send to you in one of our next communications.

With our very best wishes to you.

For the Organizing Committee,

Philip Grammaticos                                                          Vasileios Kokkas
